**GREAT
GIFT IDEA!**

Stop banging your head on awning arms! Prime's Awning Arm Alert attaches to most awning arms with quick release Velcro strap. During daylight the fluorescent strap is hard to miss. At night turn on 8 red flashing LED's to attract attention to the awning arm. LED's are visible from the front and back side of the Awning Arm Alert. Long battery life allows for over eighty hours of use. Replacement batteries are available. Can be used to warn of other obstructions such as mirrors, hitches or bike racks. Makes excellent capmsite locator or marker.
